

Your Digital Day made **EASY**

SEdesk™ is a **unified workspace**, providing one-stop access to web, SaaS and legacy applications through a **browser-less** isolated environment delivering a **secure true desktop** experience while **reducing IT costs**

Designed to augment IT efficiency and improve business value

IT and security teams are yet freed from manual and time consuming network and endpoint configuration.

SEdesk drastically drops your virtualised workspace setup time from days to hours with no intervention on the endpoint.

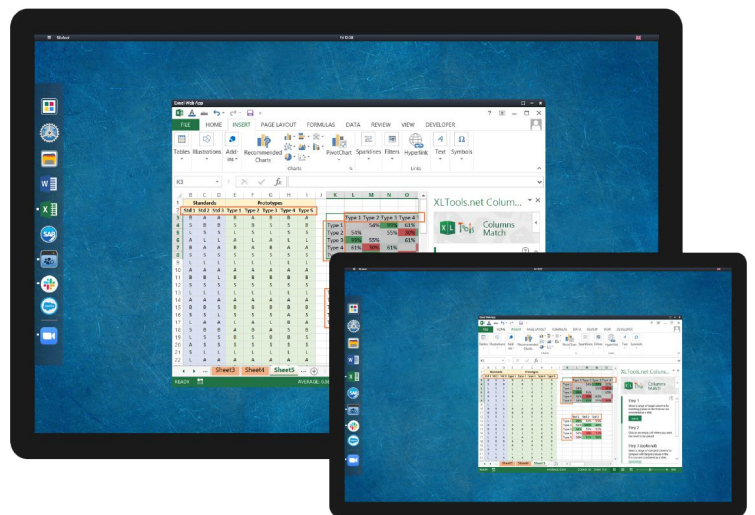

With SEdesk daily IT tickets like forgotten passwords, lost VPN connections and access to remote applications are no longer a pain. End users can focus on getting their job done.

True desktop experience for increased productivity

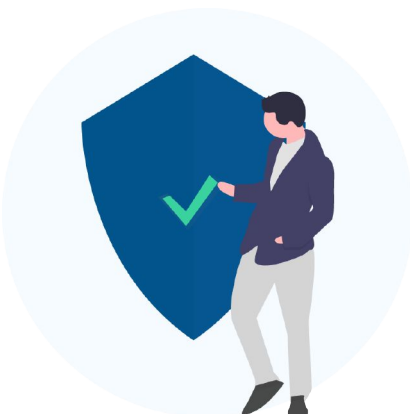

Applications are displayed through icons on Desktop and are just one click away.

Users are provided with a personalised and ready to work environment, where access to applications is done with Single Sign On.

Regardless of OS, device and deployment, adoption is straightforward with a shallow, short learning curve.

The most secure digital workspace from network to endpoint

Sharing your network resources with your employees and partners has never been more secure.

SEdesk extends your network security to the endpoint reducing the surface of attack.

Put your mind at rest, your company data are constantly protected by advanced mechanisms and protocols resilient to post-quantum cryptography.
